## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In Claim 1, Lines 16 - 17, applicant refers to "a flexible reinforcing cloth located in a part of the cover portion to contact the key accessories as the key is inserted into the key cylinder." The language "...contact the key accessories as the key is inserted..." is unclear because it is not clear whether applicant is referring to the cloth contacting the key accessories during the time period when the key is being inserted or otherwise, thus it is vague and indefinite. Accordingly, Claim 1 and all claims dependent thereof are rejected. To rectify this indefiniteness applicant may wish to amend Claim 1 to read "a flexible reinforcing cloth located in a part of the cover portion to contact the key accessories when the key is inserted into the key cylinder," so as to clarify the invention actually being claimed.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated

Art Unit: 3616

by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 1 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over Claim 1 of copending U.S. Application No. 10/744,134. Although the conflicting claims are not identical, they are not patentably distinct from each other because Claim 1 of U.S. Application No. 10/744,134 meets all of the limitations of claim 1 of the instant application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Allowable Subject Matter***

4. Claims 2-7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

5. The following is an examiner's statement of reasons for allowance: The prior art discloses a knee-protecting airbag device located below a steering column in front of a driver and, at a lower side of a key cylinder into which an ignition key with accessories is inserted, the airbag device comprising: a housing located below the steering column for housing an airbag; an airbag folded and housed in the housing in undeployed condition, and upon inflow of inflation gas, the airbag protruding rearward from the housing to deploy upward for protecting knees of the driver. See e.g., Bertrand (U.S. 2,834,606); Hass et al. (U.S. 3,784,223); Takimoto et al. (U.S. 6,942,245); Takimoto et al. (U.S. App. 10/137,468).

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
